## ABOUT ME

I am a frontend developer in India. I write sweet and scalable code to develop beautiful functional pages. With over a year and a half of experience working with Vue. During a recent break from work, I dedicated myself to deepening my JavaScript knowledge and mastering React. With my newfound proficiency in React and a strong foundation in JavaScript, I am excited to contribute as a Junior Developer.

## EXPERIENCE

### Frontend developer

Nirman Lab | Jul 2022 - Mar 2023

Joined frontend team responsible for migrating Laravel legacy codebase to Vue JS. The company handled an e-commerce web app for a Norway-based multi-vender tour and hotel provider. I developed numerous admin pages, re-factored the entire project's breakpoints for better responsiveness, worked on cart functionality, implemented a custom stripe payment page, and more.

### Web Developer Intern

Nirman Lab | Jan 2022 - Jul 2022

During my Internship, I was responsible for grasping the basics of the go programming language for backend development, practicing my frontend skills with HTML and vanilla JS, and learning Vue JS. At the end of this period, I'd delivered a full stack CRUD app build with Vue frontend and backend with Go lang.

### Content Writer Intern

Writing Cultures | Jan 2021 - Jun 2022

Parallel with my studies, I joined a content writing service-based Startup based in the USA. I was responsible for maintaining a medium blog on tech and finance. I also worked as a ghostwriter for several clients in categories varying from professional, to personal, to educational content.
